EDUCATION

University of Florida

Bachelor of Science in Computer Science, Minor in Math — GPA 3.92

Gainesville, FL

Aug. 2023 – May 2027

EXPERIENCE

Teaching Assistant (COP3503C C++)

Jan 2026 – Present

University of Florida

Gainesville, FL

- Leading weekly discussion sections with 30+ students to teach problem solving, debugging, and core C++ concepts
- Writing exam questions which align with course objectives
- Hosting weekly office hours to provide students with 1:1 code review and support for assignments and projects

Undergraduate AI Research Assistant

Aug 2025 – Present

University of Florida

Gainesville, FL

- Conduct experiments with attribution methods to evaluate model interpretability
- Develop and test deep learning models for image classification with an explainability focus
- Create attribution maps to design secondary classifiers to distinguish in-distribution vs out-of-distribution data

Math Tutor

May 2025 – Present

The Tutoring Company

Gainesville, FL

- Provide, apply, and adapt instructional strategies to help students' performance in various areas of math
- Foster a friendly, informative, and engaging environment in both in-person and virtual settings
- Assess students' progress and provide feedback to further help students develop problem-solving skills

PROJECTS

Community Compass | *Python, FastAPI, React, Tailwind CSS, SQLite, OpenStreetMap API*

Jan 2026

- Built a full-stack web app that matches users to nearby essential community resources via 3 simple steps and an interactive map UI
- Aggregated and normalized geospatial data from multiple APIs (OpenStreetMap, USDA SNAP, Little Free Library) with fallback logic to improve category alignment and map accuracy
- Developed a FastAPI backend with SQLite persistence for user-submitted markers and used Gemini to generate concise service descriptions for each location

Gator Gabber | *Python, React, Bootstrap, FastAPI, RAG, OpenAI API, SQLite*

October 2025

- Built and deployed a full-stack, AI-powered Spanish conversation tutor with speech-to-text input and text-to-speech output for hands-free practice
- Implemented a Retrieval-Augmented Generation (RAG) pipeline that retrieves relevant course material via a vector store to generate more syllabus-aligned responses using the OpenAI API
- Shipped real-time learning aids—instant English translation, syllabification for pronunciation, and adjustable voice controls to boost comprehension and speaking confidence

Delivery Driver Interface | *Python, Excel, Tkinter, OOP*

Jan 2023

- Leveraged delivery driver experience to demonstrate creativity and passion for coding by turning a real-world issue into a personal project that benefited my work, personal efficiency, and others
- Developed graphical user interface using Tkinter for tip tracking and financial analysis, integrating data directly into Excel for comprehensive reporting
- Automated data entry processes into Excel, streamlining operational efficiency and reducing manual data handling errors

TECHNICAL SKILLS

Languages: Python, C++, JavaScript, HTML/CSS

Frameworks: React, Node.js, Flask, TensorFlow, PyTorch, FastAPI
